

Mr. George J. Kelley, Jr.  
County Executive  
County of Fairfax  
Fairfax, Virginia 22030

Dear Mr. Kelley:

Your letter of December 7, 1971, has been received, and I wish to advise you that the apportionment action to which you refer has not yet been settled. The required survey and the official allocation of the various parcels of land involved in the Federal Highway Administration declaration of excess property at the Fairbank Highway Research Station thus far have not been completed.

The Central Intelligence Agency has no fences which are to be removed. The CIA Employee Activity Association did install a fence to protect the baseball fields and appurtenances from improper use and destructive practices. The fence also tends to restrain persons from walking out onto Route 193 from the recreation areas. This fence and the recreation areas are now under the jurisdiction of the National Park Service and the fields are currently available to the public according to David Ritchie, Superintendent, George Washington Memorial Parkway, National Capital Parks, National Park Service. Mr. Ritchie has advised this Agency further that he considers the fence an asset and plans to continue using it for the purposes for which it was constructed.

The Federal Highway Administration and CIA are collaborating on plans for a fence to separate the Government property assigned to them from the public park. Plotting and installation will commence as soon as the required survey has been completed and the official transfer taken for all parcels of land. General Services Administration, Federal Highway Administration, National Park Service, and Central Intelligence Agency officers have concurred in the approximate location of this fence, pending receipt of the survey and the official allocations to the receiving agencies.

Sincerely,

L. E. White  
Executive Director
